A2iA Named Finalist for KMWorld's KM Promise Award for Continuous Innovation in Providing Organizations with Tangible Results for Improving Complex Business Processes

New York, November 17, 2015 – A2iA ([@A2iA](#)), the industry's leading developer of specialized software tools that help users optimize their data capture, document processing and workflow automation capabilities, announced today it was named a finalist for [KMWorld's KM Promise Award](#). This award annually recognizes organizations who deliver on the promise to provide innovative technology solutions within knowledge management, and whose technology improves business processes with real-world and tangible benefits for its users.

[A2iA's product suite](#) includes software toolkits available for seamless integration into both server- and mobile-based applications. Trusted globally and proven to automatically locate and extract data ranging from structured and machine printed information, to unstructured cursive handwritten data, A2iA's partners see a tangible savings in both processing time and operational cost as they gain more access to data previously out of reach due to its complexity.

"A2iA is proud to be recognized for our continued dedication to improving complex business processes and for delivering software that addresses market demands," said Jean-Louis Fages, A2iA President & Chairman of the Board. "A2iA strives to be a global leader in this space and today's recognition from KMWorld confirms our focus on product innovation, R&D and our market successes."

Released earlier this year, [A2iA TextReader™](#) is A2iA's newest software toolkit that utilizes a new and unique RNN-based technology developed in-house by A2iA's award-winning R&D Team. For the first time on the market, the same powerful engine can be used for printed and cursive text recognition – without the use of a dictionary. Supporting multiple languages, including cursive Arabic, this unique offering is simple to integrate and can be applied to documents found within numerous vertical markets to further their knowledge management and business process management solutions.

About A2iA

For more than 24 years, [A2iA](#) has been committed to the research and development of its handwriting recognition and document classification solutions to create more efficient ways for organizations to improve business intelligence. Available in 36-country versions and 7-languages, A2iA's award-winning toolkits are trusted worldwide to streamline document workflows and reduce the need for data-entry throughout industries such as banking/finance, healthcare, insurance, government, and service bureaus/outsourcing firms. For more information, visit www.a2ia.com or call +1 917-237-0390 within the Americas, or +33 1 44 42 00 80 within EMEA or Asia.
