

FOR IMMEDIATE RELEASE

A2iA Named to KMWorld’s 2018 List of “100 Companies that Matter in Knowledge Management”

New York, March 8, 2018 – A2iA ([@A2iA](https://twitter.com/A2iA)), a world leading developer of artificial intelligence and machine learning based text recognition, information extraction and intelligent document classification toolkits, announced it has been named to KMWorld’s 2018 list of “100 Companies that Matter in Knowledge Management.” Dedicated to providing image analysis, data recognition and workflow automation capabilities from both desktop and mobile environments, A2iA’s scalable SDKs are integrated into end-to-end partner applications and service bureau operations to deliver add-on features that speed automation and simplify customer engagement.

“The organizations named this year to our list of 100 Companies That Matter in Knowledge Management have captured and sustained our interest through their functionality, success with clients and innovation,” says KMWorld Editor Sandra Haimila. “When we look at the technologies they offer, we are awed by the progress, excited by what the future will bring and confident they will enrich our lives. The companies we have chosen for our 2018 list have proven their business value to customers. We are impressed.”

A2iA is a global SDK developer with partners in more than 42 countries, and product able to address the local language and country locale in which it is deployed. The company’s Paris, France headquarters houses its main research laboratory – one of the world’s largest private research centers of its kind. A2iA’s R&D Teams in Paris and Saint Petersburg regularly develop new features and enhancements to address the changing global landscape.

KMWorld’s list of the “100 Companies that Matter in Knowledge Management” is published in the March issue of KMWorld Magazine and online at www.KMWorld.com.

About A2iA

[A2iA](http://www.a2ia.com), Artificial Intelligence and Image Analysis (www.a2ia.com), is an award-winning developer of handwriting recognition, text extraction and document classification software. With simple, easy to use and intuitive toolkits, A2iA delivers add-on features that speed automation, simplify customer engagement and quickly capture all types of data from documents – whether captured by a desktop scanner or mobile device. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all types of documents to become part of a structured database, making it searchable and reportable, with the same level of flexibility as printed or digital data.
