

Banking Solutions

Streamlined workflows. Tangible results. Miles ahead of the competition.

Helping Financial Institutions Capture Improved Profitability by Driving Global Payments and Information Exchange

Many of the modern conveniences banking customers enjoy today are enabled by A2iA's data, image and word recognition innovations. In fact, A2iA's check processing software and document management technologies have become an indispensable part of global commerce, helping to improve efficiency, reduce fraud and enhance convenience.

Capturing and Powering Global Commerce with Speed and Certainty: *A2iA CheckReader*

Global financial institutions have shaped their operations to utilize *A2iA CheckReader* as their core engine across multiple applications. From branches to back offices, ATMs, merchants, fraud applications and more – you can bank securely from almost anywhere in the world with *A2iA CheckReader*.

- Trusted by **8 of the top 10 US-based banks**, 90% of French banks, 90% of Brazilian Banks, and 100% of UK banks
- **More than 50,000 points of deposit** world wide
- **Over 60,000 ATM** installs in the US, UK and France
- **Millions of daily transactions** success fully processed

Manage Your Accompanying Forms and Documents with Ease.

Complex documents are often problematic for organizations trying to automate their document workflow because they typically rely on human paper-handling. The added value you'll find only with *A2iA DocumentReader* is its unmatched ability to process even the most complex documents – including handwritten notes, claims, application forms or onboarding documentation. Eliminate these operational headaches by automating the unnecessary manual processes of document sorting and manual data entry.

This translates directly into improved speed to information, data accuracy and organizational profitability. It's that simple.

No Limitations, No Boundaries – Process Transactions on the Go

With *A2iA Mobility*, you can take your data recognition and image analysis capabilities with you wherever you go. It's like having a back office in your back pocket! Now, anywhere you might need mobile data recognition, *A2iA Mobility* makes it happen. Fueled by proprietary and patented technology, *A2iA Mobility* is designed for integration into Android and iOS apps.

And with its offline capabilities, all image analysis and data extraction is performed locally on the phone or tablet offering a seamless, more convenient user experience – for the everyday consumer or remote agent in the field without a data connection.
