

Company Overview

A WORLD LEADER IN HANDWRITTEN AND PRINTED TEXT RECOGNITION FOR MOBILE AND DESKTOP

Company Profile

Award-winning with research and development at its core, A2iA is a science and R&D driven software company with deep roots in artificial intelligence, machine learning and neural networks. With simple, easy to use and intuitive toolkits, A2iA delivers add-on features to speed automation, simplify customer engagement and quickly capture all types of data from documents – whether captured by a desktop scanner or mobile device.

Core Markets

Banks & Fintech, Telecom, BPO, Healthcare, Insurance, & Government

Real Advantages. Tangible Results.

- Provides structure to unstructured content by allowing it to become part of a structured database -- making it searchable and reportable, with the same level of flexibility as printed or digital data.
- Credited with several industry firsts, including full check and unstructured document recognition, advanced transaction-level classification, and cursive Arabic recognition.
- Accuracy and reliability in product performance, designed to improve overall business operations.
- Trusted by thousands of end-users around the globe to process hundreds -of-millions of documents daily within corporations, governments and financial institutions, including 8 of the top 10 US-based banks, 90% of French banks, 90% of Brazilian banks, and 100% of UK banks.

One Core Technology: Desktop & Mobile

a2ia TextReader™ performs a full text transcription on both printed and cursive documents, without a dictionary or customization. Delivers the only cursive Arabic recognition solution on the market today.

a2ia Mobility™ patented technology, delivers a global and client-side footprint by performing all image cleanup, correction and data extraction directly on the mobile device, without a server, Wi-Fi or data connection.

a2ia mCapture™ combines mobile capture with Auto-Locate, preprocessing and image conversion within a small footprint.

a2ia mNote™ is the first toolkit of its kind for integration into mobile operating systems, note taking apps, and more, to deliver full cursive text transcription directly on a mobile device, without a dictionary, offline.

a2ia DocumentReader™ performs advanced, transaction-level classification and key-field extraction.

a2ia FieldReader™ locates and captures data from semi-structured documents and forms, reducing data entry for paper-intensive businesses.

a2ia CheckReader™ recognizes all fields on checks and payment documents, whether written in machine print or cursive handwriting and gives information about image quality, usability and negotiability in 1-call to the engine.

a2ia XE™ is powered by an RNN engine and delivers significantly higher levels of accuracy as compared to other industry offerings for check image processing.

QUICK GLANCE

Founded 1991

42 Country Footprint

15,000 Clients

380+ Partners

26 years of expertise in Pattern Recognition

25% of Revenue allocated to R&D

3 Sites
Paris / New York / Saint Petersburg

1st in Worldwide Handwriting Recognition Competitions

Driven by Artificial Intelligence, RNN, Machine Learning

11 languages: French, English, German, Spanish, Italian, Portuguese, Arabic, Chinese (Simplified & Traditional), Russian, Korean, Japanese
