A2iA and BOLT Document Management Announce Integration and Availability of Laserfiche® Connector

Bolt Script, powered by A2iA, enables Laserfiche users to recognize cursive handwriting.

NEW YORK, January 4, 2011 – [A2iA](#), the worldwide leading developer of tools for handwritten and machine-printed text recognition, data extraction, and the intelligent classification of paper documents, announced today that [A2iA FieldReader™](#), its proprietary toolkit designed for extracting information from structured and semi-structured forms, has been integrated into BOLT Document Management’s *Bolt Script*. *Bolt Script*, a software add-on that enables Laserfiche® ECM users to incorporate handwritten documents into their workflow, can be applied to a multitude of verticals including banking, finance, healthcare, insurance, government, manufacturing, education and utilities.

“Integrating the powerful recognition abilities of A2iA with world class Laserfiche® ECM systems can quickly pay for itself in high volume applications,” said Jeff Nelson, BOLT Vice President. “By allowing organizations the ability to automate the extraction of handwritten information on forms and other complex documents, they reduce, and many times eliminate, the need for labor intensive hand-keying of information.”

BOLT and A2iA will officially debut *Bolt Script* at the upcoming Laserfiche Institute Conference in Los Angeles, California on January 10-12, 2011. Attendees can [register online now](#) to attend a Bolt Script workshop at the conference.

Availability

Bolt Script, powered by A2iA, is available through BOLT at [www.getbolt.com](#) or by calling +1 574-522-6595.

About A2iA

[A2iA](#), Artificial Intelligence and Image Analysis ([www.a2ia.com](#)), is the worldwide leading developer of handwritten and machine printed text recognition, information extraction and intelligent document classification toolkits. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all types of forms, documents and checks, including unstructured handwritten letters, to become part of a structured database, making it searchable and reportable, with the same level of flexibility as printed or digital data. The company’s proprietary OCR, ICR and IWR toolkits do not contain any third-party technology and are available in 23-country versions and 6-languages. Proven to reduce costs and nearly eliminate data-entry and manual document processing, A2iA’s technology has been improving business process automation and providing a visible ROI for nearly 20 years as it
