A2iA & Cedricom Deliver Innovation to France's Banking Market with the Ability to Deposit Checks from a Mobile Phone with Real-Time Results

Paris, France, September 5, 2017 – A2iA ([@A2iA](#)), an award-winning developer of artificial intelligence and machine-learning based software for the worldwide data capture, document processing, and payment systems markets, today announced a partnership with [Cedricom](#), a developer of innovative banking and payment solutions that manage payment flows. Under the terms of the Agreement, Cedricom has integrated *[a2ia Mobility](#)*™, a recognition toolkit, into Mobicheque, its solution that enables the ability to perform mobile remote deposit capture (mRDC) by taking a photo of a check for the immediate acceptance by the depository bank. Deployed either as a mobile app, an HTML5 page or as a web service, Mobicheque automatically reads the check number and amount without any manual keying. The user experience is intuitive and the results are provided in real-time.

"The banking industry is rapidly transforming and mobile remote deposit capture is a growing trend throughout France and Europe. Our combined offering to the French market meets these demands with innovation and simplicity," said Mr. Christian Crickx, General Director of Cedricom.

By using Mobicheque, users gain flexibility and productivity by remaining in control of their payments with the ability to always being synchronized to their bank in a secure and digital environment.

About A2iA
Award-winning with research and development at its core, [A2iA](#), Artificial Intelligence and Image Analysis, is a science and R&D driven software company with deep roots in artificial intelligence, machine learning and neural networks. With simple, easy to use and intuitive toolkits, A2iA delivers add-on features to speed automation, simplify customer engagement and quickly capture all types of printed and handwritten data from documents – whether captured by a desktop scanner or mobile device. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all types of documents to become part of a structured database, making it searchable and reportable, with the same level of flexibility as printed or digital data.
