

FOR IMMEDIATE RELEASE

A2iA to Showcase Artificial Intelligence Software for Mobile and Server Workflows at Forum Banca Event

A2iA's add-on features capture all types of printed and handwritten data from payments and checks, identity cards, and documents

Paris, France, September 19, 2017 (Forum Banca, Stand #7) – A2iA ([@A2iA](#)), an award-winning developer of artificial intelligence and machine-learning based software for the worldwide data capture, document processing, and payment systems markets, will showcase its mobile and sever-based toolkits at Forum Banca, a premier event in Italy focused on innovation for the banking and fintech sector. A2iA's add-on features are proven to speed automation, simplify customer engagement and quickly capture all types of printed and handwritten data from payments and checks, identity cards, and documents, regardless of whether the image was captured by a desktop scanner or mobile device. Published in multiple languages and country versions to address the global workflow, A2iA's software toolkits are available for integration by banks, service bureaus / BPOs, and software partners.

One of A2iA's software partners, [FDM Document Dynamics](#), will be showcasing their new onboarding solution at Forum Banca, which includes both a mobile app and web service. This offering is powered by [a2ia Mobility](#)[™], a toolkit dedicated to image analysis, image clean-up and data extraction for identity cards, checks, and other forms. With offline and client-side features, FDM's solution also enables remote workflows such as sellers and agents.

“By including A2iA's AI software, FDM is able to provide unparalleled service, recognition of documents, and related data and information, for documents capture through a web service or mobile,” said Andrea Artusi, FDM Document Dynamics CEO. “Through the FDM mobile on boarding service, which can be associated with all other FDM (analog and digital) services and solutions, digital processes can be generated and distributed even in the field.”

For more information about A2iA's OCR, ICR and IWR software toolkits, powered by artificial intelligence and machine learning, visit A2iA at [Forum Banca](#), Stand #7.

About A2iA

For more than 24 years, A2iA has been committed to the research and development of its handwriting recognition and document classification solutions to create more efficient ways for organizations to improve business intelligence. Available in 42-country versions and 9-languages, A2iA's award-winning toolkits are trusted worldwide to streamline document workflows and reduce the need for data-entry throughout industries such as banking/finance, healthcare, insurance, government, and service bureaus/outsourcing firms. For more information, visit www.a2ia.com or call +1 917-237-0390 within the Americas, or +33 1 44 42 00 80 within EMEA or Asia.
