A2iA Signs New Partnership Agreement with US-Based Mobile Remote Deposit Capture Software Provider, for Integration into their Core Product Offering

A2iA Mobility integrated into leading mRDC application, allowing software partners and financial institutions the ability to select their recognition engine.

New York, September 10, 2013 – A2iA ([@A2iA](#)), a developer of specialized and highly intelligent software tools that help end users optimize their data capture, document processing and workflow automation capabilities, announced today that [A2iA Mobility™](#), its patent-pending software toolkit, has been integrated into a leading mobile remote deposit capture (mRDC) application for distribution within the United States and Canada. By integrating *A2iA Mobility* into one of its principle software applications, A2iA’s newest mRDC partner will offer its distributors and end users the ability to select their core recognition engine. Users will benefit from A2iA’s offline capabilities, gaining a more seamless user experience with increased automation, while banks and credit unions will see reduced keying costs and risk for fraud, presenting a unique market differentiator.

“We are seeing a tremendous amount of interest for *A2iA Mobility* and are excited to sign this new agreement with a US-market leader,” said Jean-Louis Fages, A2iA President & Chairman of the Board. “This new partnership reinforces the technology behind *A2iA Mobility*, proving its ability to meet market demands in a highly competitive environment.”

With a Global footprint and available for integration into a variety of mobile applications, including mobile remote deposit capture / check deposit, [A2iA Mobility](#) is available for Android and iOS platforms. Residing client-side, the software toolkit performs all image capture, cleanup (image quality analysis, IQA / image usability analysis, IUA) and data extraction directly on the smart phone or tablet -- no server is required, uncovering new opportunities for users looking to capture information in remote locations.

About A2iA

[A2iA](#), Artificial Intelligence and Image Analysis (www.a2ia.com), is the worldwide leading developer of specialized and highly intelligent software toolkits that help users optimize their data capture, document processing and workflow automation capabilities. Since its inception, A2iA has been a science-driven and research-based software developer and our products feature state-of-the-art and proprietary recognition technologies, including handwriting recognition, intelligent word and optical character recognition, and automatic classification engines, that address our customers’ complex data extraction and document processing needs. A2iA’s products are critical components that help drive information system accuracy, efficiency and ROI performance. Working closely with our end user customers and our worldwide network of system integrators, A2iA also ensures each solution makes fiscal sense and fits seamlessly within the information technology environment.
