A2iA Recognized as 'KMWorld Promise Award' Finalist Due to Innovation and Worldwide Achievements of *A2iA DocumentReader*™

A2iA honored for a fourth year as a KMWorld Promise Award Finalist
and for the fifth time this year.

NEW YORK, October 20, 2010 – A2iA, the worldwide leading developer of tools for handwritten and machine printed text recognition, information extraction and intelligent classification of paper documents, announced today it was named a *KMWorld Promise Award* finalist because of *A2iA DocumentReader*™'s innovation and worldwide achievements. *A2iA DocumentReader* is unique to the market and is proven to reduce costs and speed processing times by allowing users to automate a workflow that contains data ranging from machine print through to cursive handwriting on completely unstructured white mail or archives. This proprietary toolkit is also adept in locating, extracting and classifying complex data from columns or lists such as that commonly found within lockbox applications or EOB documents, reducing the manual labor typically associated with processing complex or unstructured documents.

"We are excited to see the worldwide success and adoption of *A2iA DocumentReader*," said Jean-Louis Fages, A2iA President & Chairman of the Board. "As a toolkit, users have the benefit of being able to customize their solutions to the needs of their users, such as declassification for the government, or to aid in providing meaningful use within EHR / EMR solutions in the medical space."

This is the fourth year that A2iA has been designated a *KMWorld Promise Award* finalist, a recognition given to organizations who deliver innovative technology solutions to their customers, who in turn see real-world successes in the areas of knowledge management and improved business processes.

A2iA has received five awards in 2010. Other honors include:
- ACE Award Finalist, ECM Connection - *Third Consecutive Year*
- Best Channel Vendor, Business Solutions Magazine - *Second Consecutive Year*
- Top 100 Companies that Matter in Knowledge Management, KMWorld - *Third Consecutive Year*
- Trend Setting Product of the Year, KMWorld - *Third Consecutive Year*

About A2iA

A2iA, Artificial Intelligence and Image Analysis (www.a2ia.com), is the worldwide leading developer of handwritten and machine printed text recognition, information extraction and intelligent document classification toolkits. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all types of forms, documents and checks, including unstructured handwritten letters, to become part of a structured database, making it searchable and reportable, with the same level of flexibility as printed or digital data. The company's proprietary OCR, ICR and IWR toolkits do not contain any third-party technology and are available in 23-country versions and 6-languages. Proven to reduce costs and nearly eliminate data-entry and manual document processing, A2iA's technology has been improving business process automation and providing a visible ROI for nearly 20 years as it enhances forms-processing, transaction-processing, content management, document management, and knowledge management systems worldwide.
