A2iA Signs Agreement with Global Provider of Merchant Payment Services to deliver capabilities for Offline Mobile Remote Deposit Capture

New York, March 10, 2016 – A2iA (@A2iA), an award-winning developer of software for the worldwide data capture, document processing, and payment systems markets, announced a new partnership with a Global provider of merchant payment services. Under the terms of the agreement, *A2iA Mobility*™, A2iA's client-side and offline mobile SDK, will be integrated into the provider's mobile app to automatically extract data from checks and to confirm that the image meets all image truncation requirements, such as Check 21 standards in the United States.

"We are pleased to extend our market reach by partnering with this Global provider of services for merchants and small-to-medium sized businesses," said Jean-Louis Fages, A2iA President and Chairman of the Board. "With a Global footprint and the ability to address payments from around the world, *A2iA Mobility* is a natural fit to help expand services with this software provider."

Once deployed, this new offering will enable merchants and small-to-medium sized businesses to process checks captured at the storefront on a smartphone or tablet, or at a point of presentment in the field, regardless of whether the device is connected to a cellular or Wi-Fi service.

About A2iA Mobility
A2iA Mobility is the only mobile toolkit on the market to include check recognition support for the United States, Canada, and countries in Latin America, Europe and Asia Pacific. With additional features to process IDs, passports, receipts and fields from forms, *A2iA Mobility* is available for integration into iOS and Android applications. By combining its patented Auto-Locate™ feature with its offline functionality, *A2iA Mobility* delivers a quick and simple user experience, including the ability to automatically locate and capture a document, check or ID from a video stream when it is found in focus. Then, without any manual keying, all pertinent data is located and extracted directly on the handset – without any data connection or Wi-Fi.

About A2iA
A2iA, Artificial Intelligence and Image Analysis (www.a2ia.com), is the worldwide leading developer of handwritten and machine printed text recognition, information extraction and intelligent document classification toolkits. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all forms, documents and checks including unstructured handwritten letters, to become part of a structured database, making it searchable and reportable, with the same level of flexibility of printed or digital data. For more information, visit www.a2ia.com or call +1 917-237-0390 within the Americas, or +33 1 44 42 00 80 within EMEA or Asia.
