A2iA Signs Agreements with Four of the Largest European Retail Banks for Mobile Payments Automation

A2iA announces deals with one of the top two U.K. banks and three of the five largest French banks for mobile remote deposit capture (mRDC)

New York, New York and Paris, France, March 28, 2018 – A2iA ([@A2iA](#)), an award-winning developer of artificial intelligence and machine-learning based software for the worldwide data capture, document processing, and payment systems markets, today announced that it has closed new deals with four of the largest European retail banks. One of the largest U.K. banks, and three of the largest five French banks, will utilize *[a2ia Mobility™](#)* within their mobile apps to enable consumers the ability to process their checks simply by taking a photo of the check image with their smartphone or tablet. *a2ia Mobility*, a configurable SDK, features offline and client-side image analysis, A2iA's patented automatic capture feature - Auto-Locate™, and data extraction from documents like checks, identity documents, proof of residency forms, bill pay stubs and receipts.

"Digital transformation is a strategic initiative for banks around the world, and the adoption of new technologies remains paramount in their ability to address the changing needs of their customers," said Jean-Louis Fages, A2iA President and Chairman of the Board. "*a2ia Mobility*'s scalability and flexibility enables these financial institutions the ability to develop customizable solutions that simplify how consumers interact with their bank, as well the speed in which they can complete a transaction or enroll in a new account directly from their mobile device."

Last year, A2iA also announced deployments to one of the world's largest online payments companies for the onboarding of funds from paper checks into an online account for money transfer, as well as large retailers in North America for payment and identity document recognition.

a2ia Mobility supports multiple countries and languages, and is available for integration into mobile apps to speed [complex onboarding and ID recognition](#), [mobile check deposit](#), [bill pay workflows](#) and [receipt processing](#).

About A2iA
Award-winning with research and development at its core, [A2iA](#), Artificial Intelligence and Image Analysis (www.a2ia.com), is a science and R&D driven software company with deep roots in artificial intelligence, machine learning and neural networks. With simple, easy to use and intuitive toolkits, A2iA delivers add-on features to speed automation, simplify customer engagement and quickly capture all types of printed and handwritten data from documents – whether captured by a desktop scanner or mobile device. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all types of documents to become part of a structured database, making it searchable and reportable, with the same level of flexibility as printed or digital data.
