

FOR IMMEDIATE RELEASE

A2iA Announces Russia as its Newest Market of Entry

Following the opening of an R&D subsidiary in St. Petersburg, and the release of product for the Cyrillic language, A2iA sees potential in Russia as a growing market for data recognition and workflow automation

Paris, France and St. Petersburg, Russia, January 29, 2018 – A2iA ([@A2iA](#)), an award-winning developer of artificial intelligence and machine-learning based software for the worldwide data capture, document processing, and payment systems markets, today announced that Russia is its newest market of entry. The company officially opened a research and development subsidiary in St. Petersburg more than four years ago, and released its proprietary handwriting and text recognition software for the Cyrillic language in 2017. Following initial prospection engagements, A2iA sees potential in Russia as a growing market for data recognition and workflow automation among financial institutions, the administration and interior affairs, as well as with software integrators and developers.

“A2iA is proud to announce that Russia its newest commercial zone, expanding our footprint and diversifying our go-to-market strategy,” said Jean-Louis Fages, A2iA President & Chairman of the Board. “A2iA prides itself at being at the forefront of recognition software, and we look forward to showcasing our cursive handwriting and machine printed data recognition capabilities to organizations within this new market.”

A2iA is a global SDK developer with partners in more than 42 countries, and product able to address the local language and country locale in which it is deployed. With toolkits available for integration into mobile and server-based solutions, A2iA is able to address the full spectrum of real-world data regardless of its channel of capture. The company’s Paris, France headquarters houses its main research laboratory – one of the world’s largest private research centers of its kind. A2iA’s R&D Teams in Paris and Saint Petersburg regularly develop new features and enhancements to address the changing global landscape
