

For Immediate Release

A2iA Signs New Partnership Agreement with GDExpert to Deliver Content Management Solutions to the North and Francophone African Territories

Paris, FR / New York, NY, October 24, 2016 – A2iA (@A2iA), a world leading developer of handwritten and machine printed text recognition, information extraction and intelligent document classification toolkits for mobile and desktop-based solutions, today announced a new partnership with GDExpert, a company specialized in the capture, transfer, management and security of data for organizations within the territories of North and Francophone Africa. Integrated directly into GDExpert’s product suite, A2iA and GDExpert are driven by a common goal: to facilitate access to all types of data from organizations including complex documents such as those with handwriting and Arabic characters.

A2iA’s software toolkits, available for integration into document management and workflow solutions, allow for the extraction of information from structured or unstructured documents, as well as complex and cursive handwriting.

With this partnership, A2iA’s toolkits enable GDExpert’s document management platform the ability to process up to 100% of the industry’s workflows. Since there are still large volumes of handwritten archives and administrative documents within African organizations, this new partnership delivers a simple way for local companies to accelerate their document imaging and digitalization of paper documents.

A2iA’s solutions

- [a2ia TextReader™](#): full-text transcription from printed & cursive documents, without a dictionary.
- [a2ia DocumentReader™](#): advanced classification & key-field extraction from structured & unstructured documents.
- [a2ia Mobility™](#): client-side and offline, this one toolkit allows for multiple workflows & document types to be processed: mRDC, mBoarding, ID capture and more.
- [a2ia mNote™](#): conversion of handwritten notes into digital documents offline, directly on smartphone or tablet.
- [a2ia FieldReader™](#): data extraction from handwritten or machine printed forms.
- [a2ia CheckReader™](#): automatic data capture & image quality standards for checks & other payment documents.

About A2iA

[A2iA](#), Artificial Intelligence and Image Analysis (www.a2ia.com), is an award-winning developer of handwriting recognition, text extraction and document classification software. With simple, easy to use and intuitive toolkits, A2iA delivers add-on features that speed automation, simplify customer engagement and quickly capture all types of data from documents – whether captured by a desktop scanner or mobile device. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all types of documents to become part of a structured database, making it searchable and reportable, with the same level of flexibility as printed or digital data.
